

Time Capsule

Build a family time capsule.

Here's how:

1. Find a box. Decorate it . Write the date on the box.

Month

Day

Year

2. Put one item into the box that shows something about you.
3. Write a note telling why you picked that item, or have someone help you write it. Put the note in the box, too.
4. Have each family member do the same. Put the box away, maybe under your bed or in a closet.
5. Plan to open the box in one year. Mark that date on a calendar.
6. In one year, open the box together. Look at the items and read the notes. What has changed since you made the box?

School Days

Do a time capsule at school with your class. Open it up on the last day of school.

Try This

- What are the days of the week? The months of the year? See if you can say them aloud.
- Find the month of your birthday on a calendar. Now find the day. Find other dates important to you and your family.
- Make a calendar. Draw pictures for each month. What do you do in the Spring? Summer? Fall? Winter?
- Look for different kinds of calendars. Can you find a wall calendar or the calendar on a cell phone or tablet?
- Make a journal using an empty notebook. Put the date at the top of each page. Each day, write about something you did or saw. Draw a picture of it.
